## INFS2605 Intermediate Business Programming

### INFS2605 Group Assignment Project Form

- It is your team's responsibility to ensure that your source code deliverable ships with a runnable JAR file. **Submissions that do not run (or indeed, do not compile) could result in a ZERO mark for the source code deliverable of the assignment.**
- Academic honesty is expected. An incomplete or deceptive project form (i.e., a form that very obviously claims more completed than actually completed) could result in 10% being deducted from your final mark for the assignment.

Feature	Attempted?	Completed?	Notes (if required)
<b>(UM)</b> Basic Requirements for User Management	Yes	Yes	Different users will have different method to login. If the user chose the wrong method an error message will display
