

INFS2605 Group Assignment Project Form

- It is your team's responsibility to ensure that your source code deliverable ships with a runnable JAR file. **Submissions that do not run (or indeed, do not compile) could result in a ZERO mark for the source code deliverable of the assignment.**
- Academic honesty is expected. An incomplete or deceptive project form (i.e., a form that very obviously claims more completed than actually completed) could result in 10% being deducted from your final mark for the assignment.

Feature	Attempted?	Completed?	Notes (if required)
(UM) Basic Requirements for User Management	Yes	Yes	Our application allows two different types of users to log in and could remain aware of who is logged in.
(DM) Basic Requirements for Data Management	Yes	Yes	Our application's time management has been successful in meeting expectations
(JF) Basic Requirements for Journey and Flow	Yes	Yes	This part is included in "About" screen
(AF1) Invitation PDF	Yes	Yes	Has been created
(AF2) Event Runsheet Builder	Yes	Yes	Has been created

Additional comments:

After discussing in the group chat carefully, we made a unified layout for our app also made simple and clear changes to avoid misunderstandings to make sure users can easily figure out how to use them.
